

# Songlines

## Vision

- 1 **The Cave** is our collective consciousness of a 'vision' a 'dream' and a beautiful song to better our present situation in order to create a more favourable future full of prosperity, love and respect.
- 2 **The Three Rings** represent one person as such:

The **inner circle** must function in truth and love for the other two outer circles to work in harmony.

The laws of Nature and Universe are written in the Hearts of mankind.

The greatest song ever composed is the one that sings in our hearts everyday reminding us of our blessings.

**The second** set of circles represent support for the individual. Many hands make light work. Prison and crime affect us all one way or another. Feeding or dramatizing the faults, mistakes and negatives only assist in the growth of them and crime then becomes a part of our society. Support is an investment for a better future.

**The third** set of circles represents the positive functioning of people and families working together in society and living a lifestyle that prevents any individual from going to prison. Prevention is better than a cure. There is always hope and opportunity with the new generation. We now have a responsibility to be positive in our approach to guide the next generations. Once our motives are pure then the results will be pure.

- 1 This is the ***Spirit of Medicine*** talents and skills. The individual is encouraged to become aware of his or her inner medicine (natural talent) and to develop from that inner circle.
- 2 This is the ***Mother Earth Energy***. Natural laws such as the laws of attraction, gravity, physics and love are our existence on this planet. We are nurtured by our Mother Earth every day. It is important to be grateful for many of the things that make us live and allow us to love. We give thanks for what we receive and what we want to receive. Ask and ye shall receive.
- 3 ***The Dancers*** are the celebrated results of much effort, belief and love. This is what we desire of our future and by feeling grateful for it all now as if we have already received it all, we work with the lore of attraction and the lore of love. We celebrate all these positive energies and blessings in the present to receive more presents (gifts). By feeling gratitude through the heart we become the energy of what we truly want, as like attracts like.
- 4 The energy of the ***Kangaroo*** is for us to only stride forward in leaps and bounds in the sense of self-belief.
- 5 The energy of the ***Goanna*** is to have flexibility and open mindedness in all elements. Flexibility is needed for our medicines to strengthen and grow.
- 6 The energy of the ***Crocodile*** is to realise our identity, where we came from, how long we have been here, and how long we have survived and evolved.
- 7 The energy of the ***Rainbow Serpent*** is to harness the power of creativity which is the nucleus of blessings. Every moment, every minute we are living in the Dreamtime. Every moment is a moment of creation. We have the power to create. The eyes of the serpent represent our imagination and our power of thought energy. The serpent's tail is our lifestyle that follows and leaves our terrain of memories behind. We create our own lives.
- 8 The energy of the ***Fish*** is to allow us to adapt to the ebb and flow of the times. Adapt to the currents of technology and all the diversities of today.
- 9 The energy of ***Frog*** is all about reading messages from nature and the universe. Frogs tell us when it is going to rain. Rain is a blessing for many. It is very beneficial to learn and know the languages of nature, starting with human nature.
- 10 The ***Storm Bird's*** energy represents the friendships among all living things, and love for our expressions: art, music, education and all other medicines.
- 11 The ***Butterfly's*** energy is of transformation into something beautiful. The cave is also metaphorically expressing a cocoon.
- 12 The ***Wedgetail Eagle*** is an energy that allows us to see the bigger picture in any situation. This painting shows the Eagle bringing us, the dancers, with the medicine of flight in our hearts, the energy of youth, the magic of life so that we may express it as gratitude and therefore receive more.
- 13 The ***Old Man*** in the sky represents the guidance from our Ancestors who speak to us through our medicines and through the signs of nature. We thank them always.
- 14 These are the ***Sands of All*** that have been involved in this vision for years, generations, centuries, devoted and committed. All the combined efforts of these amazing, compassionate spirits have given us more leverage, faith and understanding today. All in aid to evoke our endless abundance of love and allow us the medicines to heal and fix our eyes upon a vision for an exciting, prosperous and loving future.
- 15 These ***Sands represent you***, your time and energy in reading this vision. Your energy adds to this beautiful song, this dream of a better future/present for all colours and nations. Thank you, thank you and thank you.

Prisons come in many forms, mental, emotional, physical and metaphorical. Right now we can imagine less humans being in them and more success and peace in this world.

# The Artists

The artists came together to join Totems, join minds and join hearts in sharing one dream. Thank you very much my Brothers, may Biامي the Great Spirit bless your paths and make your Dreams come true.
